

Asynchronous Messaging

- JMS
- Apache ActiveMQ

<https://github.com/CafeComJavaNaResource/messaging-jms>

Type of destination

Message

Pros

- Remote communication
- Platform/language integration
- Asynchronous communication
- Variable timing
- Throttling
- Reliable communication
- Disconnected operation
- Mediation
- Thread management

Cons

- Complex programming model
- Sequence issues
- Synchronous scenarios
- Performance
- Limited platform support
- Vendor lock-in

Thanks!
